

# ADEEL UL REHMAN

## Full Stack Developer | AI/ML & Automation Enthusiast

Lahore, Pakistan | ajadeel229@gmail.com | 0309 0005634

github.com/Adeel-Ul-Rehman | linkedin.com/in/adeel-ul-rehman-73a088294

## PROFESSIONAL SUMMARY

Computer Science undergraduate at UET Lahore with hands-on experience across full-stack web development, AI/ML pipelines, and large-scale email automation. Built and shipped an AI-driven 3D generation product, an automated system scraping and sending thousands of emails daily, and full-stack web platforms using React, Next.js, and Python. Fast learner with a track record of independently owning systems end-to-end.

## TECHNICAL SKILLS

**Languages:** JavaScript, TypeScript, Python, C++, C#

**Web Development:** React.js, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap

**Mobile Development:** Flutter (Intermediate)

**AI / ML:** Prompt Engineering, LLM Pipelines, Multi-Model Orchestration, ML Fundamentals, UI-Grounding Models

**Databases & Tools:** SQL, PostgreSQL, MongoDB, Firebase, Git, Vercel, Postman

**Automation:** Web Scraping, Email Automation & Deliverability (DNS/Warmup), Python Scripting, MS Office, Data Analysis

## PROFESSIONAL EXPERIENCE

### AI/ML Engineering Intern — Portsea Games, Islamabad (On-site)

June 2026 – July 2026

- Built end-to-end pipelines for an AI-driven 3D Website Generator: engineered a prompt-enhancement layer, a clarifying-question loop, and a dual-model architecture where one model generated the product while a second validated the output and re-fed refined prompts for iterative accuracy.
- Developed a prototype automation tool using a pretrained UI-grounding model (UGround) to convert natural-language prompts into on-screen coordinates, generating step-by-step JSON task plans to execute .exe application tasks.
- Prototyped a 3D VR room-reconstruction tool that generated navigable room models from a set of input images.

### Digital Marketing & Automation Specialist — Independent Business Collaboration, Lahore

November 2025 – Present

- Partnered with a business associate to design and operate an automated email marketing system in Python, scraping 1,000+ emails daily and sorting them into targeted, public-facing lists.
- Ran bulk personalized campaigns of 200–250 emails/day while managing DNS configuration and mailbox warmup to protect sender reputation and prevent domain flagging.

### Frontend Developer Intern — Social Swirls (Remote)

July 2024 – September 2024

- Built responsive frontend websites using React.js, focusing on component structure, UI performance, and cross-browser consistency.

### Data Operator — Electronics Retail Firm, Lahore

January 2024 – August 2024

- Owned end-to-end data operations for the firm's product and customer database — handling product entries, customer records, and recurring report generation as the sole data custodian.

## KEY PROJECTS

- Handwritten Urdu Alphabet Recognition — End-to-end ML system: data preprocessing, model training, and evaluation for Urdu handwriting classification.
- Prep Mind — AI Study Assistant — Cross-platform Flutter app integrating AI for notes, MCQs, answers, and interactive chat support.
- Hadi Book Store (hadibookstore.shop) — Full-stack e-commerce platform, live in production, built end-to-end (frontend + backend).
- The Hungry Hub (thehungryhub.shop) — Restaurant management system for a live restaurant in Rawalpindi: C# admin panel real-time synced with the website (instant menu updates), geofenced ordering (auto-detects location, blocks orders beyond 4km), automatic order punching with prep-time tracking, offline-capable operation, and auto-printed bills/kitchen slips with QR codes.

## EDUCATION

### Bachelor of Science in Computer Science

University of Engineering & Technology (UET), KSK Lahore | 2023 – 2027

### Intermediate in Pre-Engineering

Govt. Islamia College, Civil Lines, Lahore | 2020 – 2022
